Potunia Lobster and Potunia Dark Red. Both have new vibrant colours.

Selecta

Among the products that Selecta shows is the hanging petunia Famous Lilac Picotee, which combines good growth and production characteristics like compactness and early flowering with bicolor in lilac flowers with a white margin. The new Margerite LaRita Purple is well branched without making use of retardants, which makes the plant flower one week earlier. The MiniFamous™ Double, which is the first double flowered Calibrachoa series in the world, will be extended with the colours yellow and pink blush.

Syngenta Flowers

The combined assortment of Fischer and S&G Flowers results in the 'Xperience the Seasons' concept. With the concept, Syngenta wants to express that it can offer a year around assortment, especially because of the addition of Poinsettia from Fischer. The breeder presents its new joint cuttings assortments in Pelargonium and Petunia. Other products include Viola (the Delta family), Begonia Volumia, Impatiens Jambalaya and perennials out of the Calendar Colors program like Gaillardia

Sunburst, Lavandula Aromatico and Castilliano.

Danziger

Danziger releases almost 90 novelties for the new season of 2008-2009. The highlights among them are Bacopa Scopia Gulliver Blue Sensation that features big flowers and a good habit. A new appearance in Danziger's assortment is the Supernesia – Nemesia hybrida series of four varieties with exceptionally large flowers on upright and compact plants. Following the success of the Petunia Sunray variety, five additional varieties join it, turning them into a colourful new series that flower uniformly. Danziger introduces another 11 new New Guinea Impatiens varieties and a new hardy perennial plant, Salvia nemerosa.

Kieft-Pro-Seeds

In the perennials series with first year flowering Armeria Ballerina, Kieft presents the Armeria Ballerina Red (FleuroSelect Gold Medal Winner). The Salvia Patio Dark Blue is a new variety in the compact growing Salvia patens Patio series. This series is characterised by a short and well branched structure of the plants. A new variety in the Tristar F1 series is the Tristar Shy Blue, which is compact and early flowering. ■
